Payment Wizard – Post Dated Payments

| Feature #	Description

| 1	• This feature will allow a user, **with permission,** to cut a physical check, with a future date.
	• New Permission within the Payment Wizard section called: Issue Post Dated Check
	• For a user with this permission the following Option will be active when Select a Payment Option, within Payment Wizard
	
	Type of Payment Printing
	Select the type.
	
	  ○ Batch payment run
	  ○ Payment on demand
	  ○ Prior to Current Date
	  ⦿ Post Dated Check
	
	[Cancel] [< Back] [Next >]
	
	• As part of the process to issue a Post Dated Check the following will apply
	  ○ User will set an appropriate due date and select invoice(s)to be paid
	  ○ User will then be prompted to set a check date
	    ▪ Check Date entered must be equal or later than the oldest Accounting Period Date of the invoice selected
	    ▪ The Check Date entered is the date that will print on the check, and the accounting period date that will be used for the payment journal entry

Accounts Payable – Enhancements

Feature #	Description

2	• Invoice Number Column within the AP Module has been updated to display 25 characters (previously this would only display the first 15 characters of the invoice number)
	• Accounts Payable – Copy function has been enabled for Intercompany Invoices
	• Enterprise AP Settings Tab
	  ○ Require Images for Manual Payments
	
	    ☑ Invoice Image Required
	    ☐ Require Image for Manual Payments
	
	  ○ Default Vendor Payment Method
	    ▪ System Default = Regular
	    ▪ At least 1 bank within the Customer must have an ePay Format assigned, in order for the ePay option

|	to be available to select
	▪ Value assigned will apply when creating a vendor manually or via Import

Financial Wizard – Attribute to Display Negative Values in Red

Feature #	Description
3	• Within Row and Column Attributes an option is available to display negative values in red • With this option enabled, negative values will display in red text, when viewing reports generated within the Financial Wizard

Budget Setup – Global Budget Management

Feature #	Description

4	• A new permission called: Global Budget Management has been created within the Budget Group
	• A user with Global Access will have the ability to Edit Budget Records at the Enterprise Level
	• When editing at the Enterprise Level a user can update records in line, or apply the following settings in a batch method
	    o Budget Status
	    o Budget Template

Maintenance – Vendor Export

Feature #	Description

5	• Within the Include Tab of the Vendor Export Form the following options have been added:
	    ○ Select All / Un-Select All Buttons
	    ○ Selection Option for Unique Identified

Miscellaneous Enhancements

Feature #	Description

6	• Localities, outside of the US and Canada, within Address Fields will display in Alphabetical Order
	• Minor Operating Department will be added as an additional department
	• Accounts Receivable – Payment Details Report
	    ○ This new report within AR will display the following data points based on the Date Range provided
	        ▪ AR Customer Name
	        ▪ Payment Date
	        ▪ Payment Amount
	        ▪ Unapplied Amount
	        ▪ Check Number
	        ▪ Comments
	• Additional Logic has been added to validate Daily Report One-Sided Details for Properties that use a Monthly Daily Report Rollover
	• Companies List – The notes field has been expanded so that all text can be viewed without the need to scroll
	• Vendor Creation / Update Imports – ACH Enabled field has been removed

		• Daily Report Mapping Grid: Group Names will display with a Bolded Font • Scheduled Reports: GL Audit Details Report Hidden • AP Recurring Invoice Prompt – Users can manually key in dates, within the date fields that exist in the Header of the Recurring Prompt • RBC – International ePay format has been updated to address some formatting issues
